

# TiPY™

## **TiPY Keyboard - A revolutionary one-handed keyboard for improved accessibility and efficiency**

**TiPY Keyboard is a new and innovative one-handed keyboard that gives you full complete control of your computer with just one hand. This breakthrough technology features a unique double-sided keyboard design that allows unrestricted use of both left and right hands through a rotating, ergonomic wrist rest. TiPY is compatible with all major operating systems and can be easily connected to any computer or laptop. TiPY Keyboard features a new key concept and integrated mouse function that makes it possible to work with all programs, including complex spreadsheets, full word processing and all the advantages and possibilities of a computer in 12 languages.**

**TiPY Keyboard's patented design is recognized worldwide and offers an unparalleled experience for people with physical limitations, arm and hand disabilities or paralysis by providing an effective solution that allows them to use all the functions of a computer with just one hand. In addition, for people who are not affected by such physical limitations, TiPY Keyboard offers a more efficient and effective way to work with multiple input devices.**

**One of the most remarkable features of TiPY Keyboard is the ease with which people can switch to it. A specially developed free online typing trainer makes the transition to TiPY Keyboard a breeze, and within no time you can be typing with one hand.**

**TiPY Keyboard has already gained significant popularity with children in schools and adults returning to work. Children with disabilities who previously struggled to keep up with their peers now have the tools they need to perform better and more easily, while adults returning to work have found a new sense of independence and efficiency.**

**TiPY Keyboard undoubtedly represents a significant advance in the future of human-computer communication. Communication is the key to understanding, collaboration and mutual support. The accessible use of TiPY Keyboard enables more people to make their work and life easier and helps to improve inclusion.**
