TiPY Keyboard

Wireless + USB-C Cord One Hand Keyboard

MacOS, iOS, Windows, Android, Linux

One Hand Keyboard

TiPY, a keyboard for ONE hand, left and right

One of the most important means of communication of our time can now be operated entirely with one hand.

With a new key concept with a number block and an integrated mouse function, TiPY enables all programs to be edited, including key combinations, complex tables, complete word processing and all the advantages and options of a computer in 12 languages.

The patented, worldwide unique, double-sided keyboard enables unrestricted use of the left and right hand via the rotatable, ergonomic palm cushion, the hand pad.

TiPY Keyboard is the new keyboard for efficient and comprehensive computer use with one hand!

The TiPY chiclet design keyboard is equipped with a key system for 12 languages. Using the integrated language setting, the multi-language buttons can be easily set to the respective language Danish, German, English, Finnish, French, Icelandic, Italian, Dutch, Norwegian, Portuguese, Swedish and Spanish.

Multifunctional keys and more directly usable special keys enable functions (such as screen brightness, mission control and media control) to be operated quickly with just one push of a button or a simple key combination.

The fully integrated mouse also make TiPY an all in one device that can be conveniently taken with you and connected to any device.
