TiPY – One Handed Keyboard

TiPYkeyboard.com

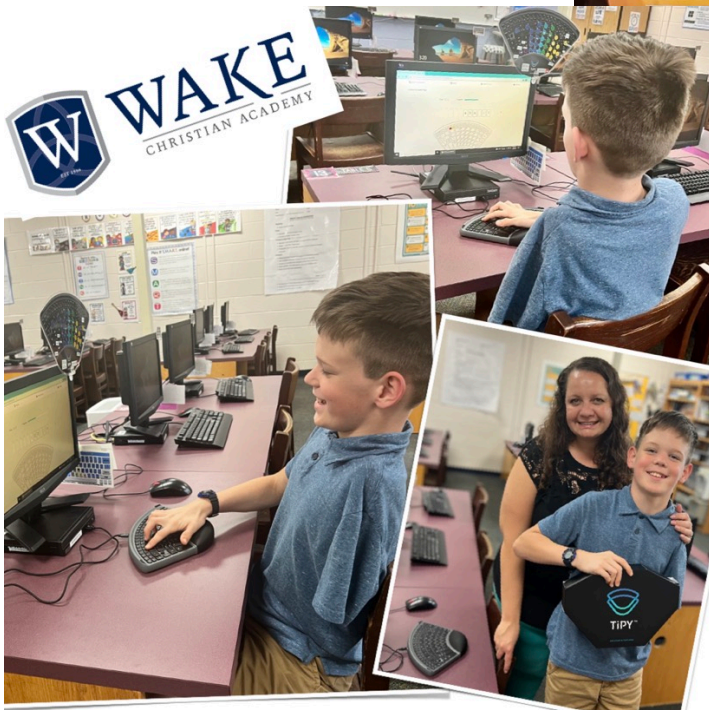

TiPY – One Handed Keyboard for Greater Independence

The TiPY one-handed keyboard is specifically designed to provide people with limited hand or arm function a comprehensive and efficient way to use a computer. It serves as an assistive tool to overcome digital barriers, enabling active participation in work, education, communication, and gaming.

Application & Target Group:

TiPY supports individuals with one-sided movement impairments – whether due to injuries, neurological conditions, developmental disorders, or musculoskeletal limitations. This includes stroke patients, people with brachial plexus injuries or amputations, as well as individuals with degenerative diseases.

Function & Benefits:

TiPY allows full control of computers and digital devices with just one hand. Users can type text, operate programs, edit spreadsheets, and precisely control the integrated mouse. Thanks to its ergonomic design and innovative key layout, the keyboard can be used efficiently with either the left or right hand.

For therapists in occupational and physical therapy, TiPY provides valuable support in rehabilitation by offering an easy and intuitive solution for regaining digital skills.

More independence – More possibilities.

Intuitive use with the TiPY Online Trainer

TiPY's innovative key concept features a gentle learning curve that can be mastered quickly with practice. The free Online Trainer helps users get started and improves efficiency.

Why TiPY?

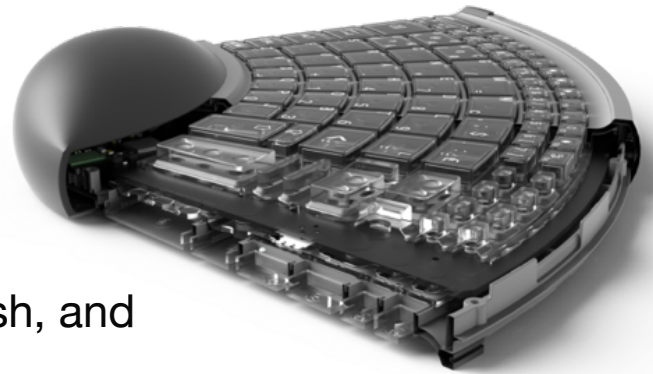

- Aid Number 16.99.04.0004 – Eligible for reimbursement by health insurance (Germany)
- Ergonomic design – Usable with both the left and right hand
- Full computer control – All functions can be operated with just one hand
- Integrated joystick – Alternative mouse control for intuitive navigation
- Wireless & flexible – Bluetooth connectivity with a built-in battery
- Compatible with Windows, macOS, iOS, Android & Linux

TiPY can do more...

More than just a new key layout and mouse function:

- Intelligent key concept – The most frequently used keys are centrally positioned for easy and fast typing. The TiPY Online Trainer simplifies learning the layout.
- Two-in-one functionality – A rotating handrest allows use for both left- and right-handed users.
- Integrated numeric keypad – Enables quick and efficient data entry.

- Multilingual support – Supports 12 languages directly on the keyboard: Danish, German, English, Finnish, French, Icelandic, Italian, Dutch, Norwegian, Portuguese, Swedish, and Spanish.
- Seamless switch between keyboard and mouse – Work efficiently without additional devices.

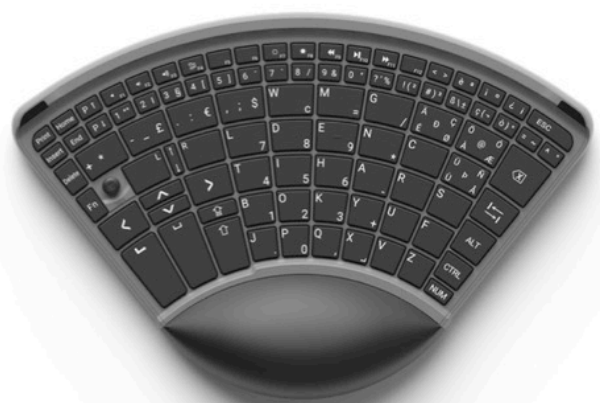

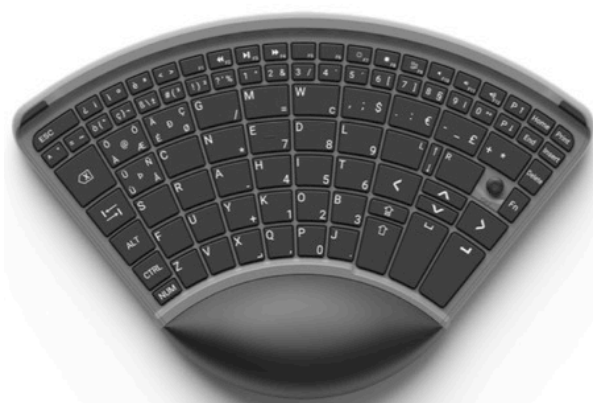

Ideal for Various Applications

- Work & Office – Full functionality for professional use
- Education & Studies – An optimal solution for schools and universities
- Rehabilitation & Therapy – Facilitates the return to everyday life after a stroke or other impairments
